

ASTON ANTHYLLIS

Anthyllis Professional --- Contains natural aqueous biodegradable extracts of Garlic juice as a soluble concentrate.

Directions for use : --- applied in a programme of treatments Anthyllis will stimulate growth, give vigour to plants and will assist in optimising the effects of fertilisation.

Regular applications will aid plants' natural resistance to insects such as Whitefly, Thrips and Aphids.

There is growing evidence that regular use of Anthyllis will assist crops to resist or recover from most of the common fungal diseases – these effects are due to the high sulphur and selenium levels of Anthyllis.

Suitable for use on all crops.

Application : --- Anthyllis may be used by drip or trickle irrigation systems or by spraying.

SHAKE CONTAINER WELL AND AGITATE WHILST MIXING

FOR SPRAYING, DILUTE 1 TO 100 IN WATER.

It is rain-fast after one hour in summer and two hours in winter.

Ideally – apply in the late afternoon when the plants are most receptive.

The strong smell of garlic will slowly fade.

AVOID CONTACT WITH EYES AND WASH EXPOSED SKIN AFTER USE.

IF THERE IS CONTACT WITH THE EYES --- IRRIGATE/WASH THOROUGHLY WITH CLEAN WATER
